GRADUA Project

"Graduates Advancement and Development of University Capacities in Albania"

585961-EPP-1-2017-1-AL-EPPKA2-CBHE-SP

The project aims at **developing a graduates databank** based on the AlmaLaurea model within the 8 Albanian partner universities, to be possibly enlarged to all the universities in the country. The databank led to the **collection and the analysis of data related to the performances and features of graduates and universities** as contribution to the ongoing reform process in the higher education sector. Moreover, the graduates CV databank, certified and available online allowed to provide firms with an innovative tool for the recruitment of qualified human resources.

Specific objectives

- To create a taxonomy of academic supply, to collect and analyze the data on universities and graduates performances in Albania
- To build up a databank of graduates belonging to the 8 partner universities
- To run an annual survey on Albanian graduates profile
- To promote a qualified access of graduates to the labour markets
- To improve the quality and efficacy of the Albanian higher education system and the cooperation between academia and the business world

Key results

- Albanian graduates databank built up comprising 16 universities in the country
- First (2018/2019) and second (2020/2021) survey on graduates profile developed
- 9.771 students and 122 firms registered on the web platform
- 99 statisticians, IT and administrative staff trained
- 2 manuals 'Compendiums of best practices' addressed to placement officers from beneficiary universities elaborated
- 7 national and international dissemination conferences organized
- 1 project sustainability plan drafted
