

## GRINSA Project

"GRaduate's INSertion and Assessment as tools for Moroccan higher education governance and management"

159238-TEMPUS-1-2009-1-IT-TEMPUS-SMGR

The **GRINSA** initiative was born from the long lasting cooperation between AlmaLaurea and the Moroccan higher education system, aimed at supporting the ongoing reform process through the **creation of a certified quality assurance system** in the Moroccan partner universities. The system is based on reliable and updated documentation on the characteristics of the graduates and on their assessment of the university experience to support decision-making processes, planning of training activities and improvement of the services addressed to university students.

### Specific objectives

- To monitor the internal and external effectiveness of the higher education system
- To promote the employability of graduates and the match between supply and demand for skilled labour
- To promote university quality assurance

### Key results

- Moroccan graduates' database built up
- Web platform matching supply of and demand for qualified labour' set up
- Moroccan graduates' profile survey carried out
- Methodology for conducting the graduates employment condition in Morocco developed

### Partnership
