Well-qualified Full Stack Developer familiar with wide range of programming utilities and languages. Knowledgeable of backend and frontend development requirements. Handles any part of process with ease. Collaborative team player with excellent technical abilities offering 8+ years of related experience.

## Work History

2021-01 -  
Current

### Chief technology officer

Wegloo S.r.l., Mantova, Milano

Since my experience in a Consultant firm was brilliant but I wanted more stimulus, I finally decided to get involved as a CTO and partner in a new SRL called Wegloo.

Wegloo born in 2018 as a Digital Marketing agency CEO was looking for an expansion in R&D and Technology sector in general, this is why asked me to join force and create a new business unit called Wegloo Technology.

During this experience I was able to develop an entire platform called TasKonnect, which is a customizable ERP/CRM, currently in use by our customers (mainly Golf Club and Automotive/Logistic).

In addition, I've earned/improved a lot of skill about:

- Machine Learning and AI in general (Already learned during my experience as a employee in Everis Spa, but improved a lot);
- Solidity and Blockchain (Recently applied to Alchemy University and studying for the final certification); - WebAR and Three.js (Learned during an ongoing project for an institutional customer);
- ReactJS (Front-End web application);
- Flutter and Dart (Cross-platform mobile application);
- NodeJS, Socket.io and Express (Back-End infrastructure);
- Python (For personal projects and Bots development);

Advanced

- Google Cloud Platform, in order to create cloud infrastructure; Kubernetes and Docker for distributing containerized application;
- IoT tools and interoperability (Used to collect TasKonnec data);
- Business Intelligence (Data Studio, QlikView, QlikSense, PowerBI);

## Software Developer

*Everis S.p.a., Milano*

Software developer for internal and R&D projects:

- Development of chatbot solutions for MSC and Alitalia, the chatbots aimed to help customer service and provide a fast possible solution for small issues;
- Development of Object recognition tool for Bricoman, which will be used to help front-office to recognize utensils using AI;
- Development of Speech to Text and Text to Speech tools for Gucci, used only for stream world wide on an internal platform.

## Team Leader

*Everis S.p.a., Haguenau*

- Development of Dashboards, made with PowerBI (microsoft BI Tool);
- Data integration with SQL Server/Azure Devops and Visual Studio (to develop E/R model).

## Solution Analyst

*Everis S.p.a., MONDELEZ INTERNATIONAL, Clamart*

- Development of Back-End and Front-End applications with Qlik stack technology (QlikView/QlikView Server version);
- Data integration with PL/SQL technology to develop an DWH system, it is also integrated with some VisualBasic functionality that permits the automatization of the system;
- Experience gained in the European field to support the customer and to train end-users.

## Solution Analyst

2017-06 -

2019-08

*Everis S.p.a, JACOBS DOUWE EGBERTS*

- Development of Back-End and Front-End applications with Qlik stack technology (QlikView/QlikView Server version);
- Data integration with PL/SQL technology to develop an DWH system, it is also integrated with some Visual Basic functionality that permits the automatization of the system;
- Experience gained in the European field (Business trips in Netherlands and Belgium) to support the customer and to train end-users.

2017-01 -

2017-06

## **Consultant**

*Banca IFIS, Mestre*

- Development of Back-End and Front-End applications with Qlik stack technology (QlikView/QlikView Server version);
- ETL integration developed by combining QlikView with BigData technologies (Hadoop, Hive, Impala).

2016-10 -

2016-12

## **Consultant**

*Banca Santander, Torino*

- Development of Back-End and Front-End applications with Qlik stack technology (QlikView/QlikView Server version);
- QlikSense Server management (QMC).

2016-05 -

2016-10

## **Solution Analyst**

*Everis S.p.a., San Donato Milanese*

In parallel with the Maccaferri project, I was required to manage a quick project for Versalis S.p.A:

Development of DWH with IBM technology (DataStage)

2015-11 -

2016-10

## **Consultant**

*Maccaferri Italia, Bologna*

- QlikSense Server management (QMC, Installation/Configuration, Certificates);
- Development of Back-End and Front-End applications with Qlik stack technology (QlikSense);

2015-07 -

2015-10

## Consultant

*Novartis Italia, Origgio*

- Development of HTML5 Mashup with QlikSense technology;
- Development on IBM technologies (Cognos, DataStage).
